# The Aerospace Industry Cluster in U.S. Metros

## Service & Manufacturing of Air Transportation

The U.S. is a global leader in the aerospace industry and since the beginning of flight on the shore of North Carolina, Americans have been enthralled with the experience and business of aviation. The three primary employment sectors that comprise the Aviation Cluster for this review include Aerospace Product and Parts Manufacturing (NAICS 3364); Air Transportation (NAICS 481); and Support Activities for Air Transportation (NAICS 4881).

### AEROSPACE EMPLOYMENT & CHANGE IN THE US

The Aerospace Industry Cluster provides employment in a variety of operations from aircraft manufacturing, commercial airline travel, air cargo, private and charter flights, to maintenance, repair and overhaul (MRO) facilities. With nearly 490,000 people in the U.S. engaged in the Aerospace Product and Parts Manufacturing process (NAICS 3364), this is the largest employment sector of the cluster representing 42 percent of the total 1.16 million U.S. aerospace workforce.

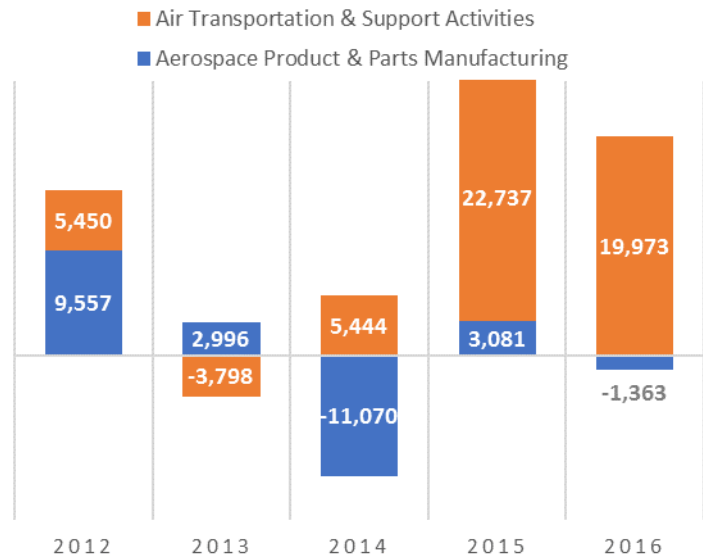

A close second is the business of Scheduled Air Transportation (NAICS 4811) including those that provide air transport to passengers or cargo on regular routes and timetables. This sector employs nearly 430,000 across the nation. The third largest sector employs nearly 200,000 involved in Support Activities for Air Transportation (NAICS 4881) which, in general, include services such as airport operations, aircraft service, repair, maintenance, as well as storage and ferrying aircraft. The final and smallest sector is Non-Scheduled Air Transportation (NAICS 4812) employs roughly 44,000 covering charter flights for passengers or cargo. This division of employment can be viewed in the pie chart below.

For this review, the functions of Scheduled Air Transportation, Non-Scheduled Air Transportation, and Support Activities for Air Transportation will be grouped into one category for comparison to the Aerospace Product and Parts Manufacturing sector. Both of these groups have experienced cyclical employment trends over the past five years with the service side of the industry growing over the past three years. Aerospace manufacturing has weathered a sizable employment loss in 2014 and a milder loss comparing 2015 to 2016. This trend can be seen in the Annual Employment Change chart above.

Overall, the Aerospace Industry Cluster has a net growth of 18,600 jobs and the 1.16 million employment level is about same amount as 2008 according to statistics from EMSI which includes Bureau of Labor Statistics covered employment, non-covered employment and self-employment. The NAICS mentioned above were used to obtain an equal comparison across metro areas in the U.S.

## 10 Top Metro Markets for Aerospace Employment

The top metro areas for aerospace employment reflect more populous metro areas with large airport operations or sizable manufacturing facilities located within the metro. Some of these metro areas may also have a high concentration of aerospace employment as measured by location quotients (LQ). An LQ is a comparison of a given region's share of employment in a sector relative to national averages. For example, Seattle-Tacoma-Bellevue WA has an LQ of 6.77 showing that the aerospace sector employment of 5 percent of total employment in that region is nearly 7 times more concentrated than .7 percent aerospace employment compared to total employment for the entire nation.

## Top 10 Metros for Aerospace Manufacturing

For **Aerospace Product and Parts Manufacturing**, California and Arizona each contain two of the top ten metros with Seattle-Tacoma-Bellevue, WA MSA topping the list with almost twice the employment of the second and third Metro on the list. The total employment of the top ten metros within this sector (NAICS 3364) is over half of the entire nation’s employment in the same sector. For three of the top ten manufacturing metros, the employment location quotient is very high –Wichita KS MSA has the highest LQ of 27.88; Seattle MSA has an LQ of 13.6; and Tucson, AZ MSA has an LQ of 8.62. Not on the top ten list for employment volume is Savannah, GA MSA with a high LQ of 16.99, home to the headquarters and production facility for Gulfstream.

## Top 10 Metros for Air Transportation & Support Activities

For **Air Transportation and Support Activity for Air Transportation**, the top metros are geographically diverse however line up closely with the nation’s busiest airports. With commercial airlines and air cargo operations making up a larger portion of this combined sector, this alignment is quite logical as illustrated in the map of the top U.S. airports based on aircraft movements and top metros for Air Transportation and Support Activities. The New York-Newark-Jersey City, NY-NJ-PA MSA is ranked as the top metro in this category and is home to three major airports. Several metros are not aligned within the top ten of busiest airport and top employment centers – Charlotte, NC and Las Vegas, NV are top airports but rank 16<sup>th</sup> and 18<sup>th</sup> respectively for Air Transportation & Support Activities.

## Summary

The Aerospace Industry Cluster, although cyclical, still proves to be a growing sector since 2014 overall. From the chart below, the increase brings total employment to 2008 levels. Both the Aerospace Product and Parts Manufacturing and Air Transportation and Support Activities provide growth opportunity for many metros across the U.S. Although, more populous areas sustain the Air Transportation and Support Activities via busy airports, some metros find a specialization in that sector such as Anchorage, AK serving a widespread area through air travel.

Aerospace Manufacturing is a coveted sector for economic development agencies, with a handful of metro areas employing a majority of its workers. There are some metros that are not yet on this radar that the NAICS code presents. NAICS codes are self-assigned by companies and therefore aerospace suppliers or possibly a newer aircraft production facility may not be reflected accurately in the NAICS code system. Several metros are emerging in the aerospace market including Greensboro-High Point NC MSA, home to Honda Aircraft Company producing the new HondaJet, and Mobile AL MSA, home to a new Airbus facility making the A320 family passenger jets.

In the following section, each metro area is listed with data covered in this study including employment, and the number of establishments.

## All U.S. Metro Areas: Aviation Industry Cluster

The table below lists U.S. Metro Areas with 2016 employment, employment concentration (LQ), and number of establishments for Aerospace Product and Parts Manufacturing (NAICS 3364) and the combined sector of Air Transportation & Support Activities (NAICS 481 + 4881).

As covered above, a location quotient is an excellent tool to quantify how concentrated an industry or occupation is in a region as compared to the nation. A location quotient of 1.2 or higher indicates a concentration or specialization of the industry or occupation.

No data were reported for 2016 for three metro areas (Kokomo, IN; Bay City, MI; and Weirton-Steubenville, WV-OH).
