The Trucking Factor in U.S. Metros

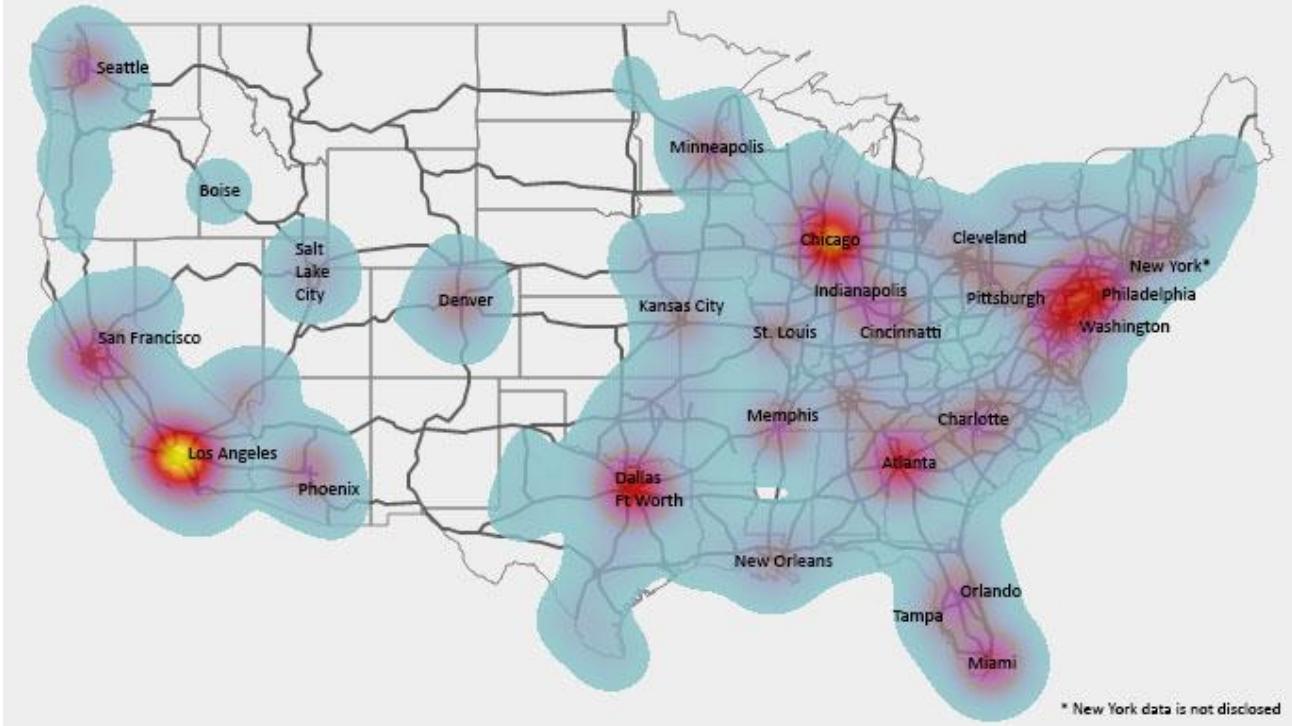

Top Metros for the Transportation Industry

In this brief we give an overview of the top markets within the Transportation & Warehousing industry utilizing Bureau of Labor Statistics data. Within this industry, a system-wide concern is the shortage of truck drivers – an essential factor in the supply chain. We analyze metros with a high concentration of this sought-after occupation.

2016 U.S. Metro Average Employment
Transportation & Warehouse Industry

The Transportation and Warehouse industry concentration follows a logical approach of the old adage of “location, location, location.” Location means access – whether that is a port, an air hub, confluence of interstate highways, and pure geographic luck. The heat map of the industry employment (above) shows major centers of distribution, situated to reach the population of the U.S. and to provide a gateway for global commerce. There are no surprises of the strong distribution markets: Chicago, Los Angeles, Dallas, Atlanta, and Miami. The top ten metro areas based on employment are listed below with the notable exception of the New York market. Data for this market has not been released by the Bureau of Labor Statistics for not meeting their data disclosure standards.

Global supply chain management has become increasingly sophisticated utilizing technology to diversify sourcing and delivery. The trend toward e-commerce fulfillment continues to grow along with the challenge of a competitive consumer environment pushing distribution towards the regionalized centers for the important “last mile” of the supply chain. Final delivery methods are changing in this last mile, particularly for urban centers such as Amazon’s Flex program – an Uber-type delivery driver for fast delivery in limited urban markets.

These trends will continue to affect logistics operations, however, the one item that continues to be important is the workforce that can carry out the supply chain. Today and for the foreseeable future, a big part of that equation is still trucking goods to their distribution centers. Truck drivers are in-demand and a quick Google search of “truck driver shortage” will bring back a plethora of articles on the subject. The table below shows the markets with the most truck drivers excluding self-employed drivers.

Top 10 Metros for Truck Drivers 2015

Ranked by Number of Heavy and Tractor-Trailer Drivers (SOC code 533032)

¹ Data is based on the average of 4 quarters of employment ending with the 1st quarter of 2016. BLS does not release data that does not meet BLS or State agency disclosure standards, most notably major market of New York-Newark-Jersey City, NY-NJ-PA MSA.

These top markets for employing truck drivers follows, quite logically, the top markets for the Transportation & Warehouse industry. However, this changes when we look at the concentration of drivers in the metro areas based on the location quotient – the number of drivers in the area related to all occupations compared to the same ratio on the national level. The table and map below highlight the top ten metros in terms of high location quotient (LQ). In general, areas with an LQ of 1.2 or higher show specialization in an industry or occupation. The top ten markets range from a high of 4.47 in Joplin, MO to 2.83 for Lincoln, NE. For some of these markets, proximity to the top distribution centers affect the concentration— such as Greeley, CO being just north of Denver. For others, it may serve a major client presence or industry, or perhaps to meet the needs of growing foreign markets such as Laredo, TX.

Top 10 Metros for Truck Driver Concentration

Ranked by Location Quotient of Heavy and Tractor-Trailer Drivers (SOC code 533032)

Metro	Truck Drivers	Location Quotient
Joplin, MO MSA	4,190	4.47
Midland, TX MSA	4,810	4.25
Greeley, CO MSA	4,550	3.76
Laredo, TX MSA	4,200	3.58
Fayetteville-Springdale-Rogers, AR-MO MSA	9,400	3.47
Fort Smith, AR-OK MSA	4,590	3.45
Cedar Rapids, IA MSA	5,250	3.05
Iowa City, IA MSA	3,200	2.93
Odessa, TX MSA	2,640	2.87
Lincoln, NE MSA	5,920	2.83

Overall, the trend of Transportation & Warehousing remaining in the top markets that are blessed with excellent location and access will continue even as the industry continues to evolve with technology and last mile delivery. The metros that will grow will be able to leverage the existing workforce to serve these needs and be dynamic to adjust to new clients and market changes.

A full listing of employment, wages and occupational data for U.S. metro areas is provided on the following pages. Data is not available for all metros as noted on the table.

All U.S. Metro Areas: Transportation & Warehousing Industry

Industry Employment & Truck Driver Occupational Data

The table below lists U.S. Metro Areas with average employment within the Transportation & Warehousing industry, average annual wages for the industry; and location quotient for employment in this sector compared to the sector's employment nationally.

Additionally, 2015 employment for the Heavy and Tractor-Trailer Truck Driver occupation, average annual wages for that particular occupation, and the location quotient for the number of truck drivers in the area compared to the number of truck drivers employed nationally.

Location quotient is an excellent tool to quantify how concentrated a particular industry or occupation is in a region as compared to the nation. A location quotient of 1.2 or higher indicates a concentration or specialization of the industry or occupation, highlighted below in green.
